

# Conflict Minerals

Compliance that works across your supply chain

With IPOINT Conflict Minerals, you run your responsible-minerals due diligence for 3TG and other critical raw materials as a repeatable, audit-ready process, from supplier campaigns to reporting. This makes Conflict Minerals Compliance a reliable building block of your Impact Intelligence.

## Campaigns that run reliably

You manage campaigns with clear deadlines, reminders, and escalations. Response rates improve and follow-up becomes predictable.

## Supplier answers you can trust

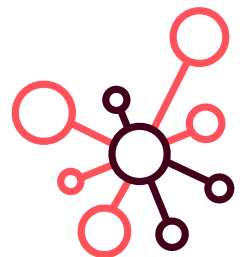

You validate responses systematically, spot inconsistencies early, and reduce rework through clear validation and reject rules.

## Risks transparent at a glance

You identify critical smelters, red flags, and key risk drivers — fully documented and prioritized.

## Why now?

Responsible minerals compliance rarely fails due to lack of intent. It fails due to volume, data quality, and time pressure. Many suppliers, varying maturity levels, changing smelter lists, and hard deadlines turn obligation into ongoing stress. IPOINT Conflict Minerals Compliance turns this into a process that becomes more stable with every campaign.

## Quick start, measurable progress

Start with a campaign that fits your supply-chain reality. Use established industry standards such as CMRT and EMRT. Manage invitations, deadlines, and status centrally.

# IPOINT

GOOD MADE POSSIBLE

### After the **first** campaign

You have transparency on responses, gaps, and risks across your supplier base.

### From the **second** campaign

You work with a reusable Conflict Minerals Standard instead of improvising every year.

### Value for key functions

#### **Compliance & Sustainability**

An audit-ready due diligence process with clear evidence and consistent documentation.

#### **Procurement & Supply Chain**

Clarity on critical suppliers, parts, and smelters with targeted steering instead of broad-brush follow-up.

#### **Legal, Audit & Quality Management**

A consistent audit log instead of scattered emails and manual proof.

### Regulatory context

Supports due diligence requirements under the Dodd-Frank Act Section 1502 and the EU Conflict Minerals Regulation as part of an end-to-end responsible-minerals governance approach.

### Supported reporting standards

**CMRT** (Conflict Minerals Reporting Template) for 3TG  
**EMRT** (Extended Minerals Reporting Template) for extended responsible-minerals scopes (e.g., cobalt, mica)  
**AMRT** (Additional Minerals Reporting Template), optional, for additional minerals and advanced requirements

### Think responsible minerals at scale

From classic conflict minerals compliance to an extended responsible-minerals strategy.

## How you work with IPOINT Conflict Minerals

- + **Manage campaigns** You invite suppliers, set deadlines, and run escalations centrally.
- + **Validate responses** You run rule-based checks with clear accept, remind, and reject logic.
- + **Prioritize risks** You identify red flags, critical smelters, and high-risk suppliers, then derive actions.
- + **Deliver reporting** You create roll-ups and reports for customers and internal stakeholders, and prepare for SEC reporting when required.
- + **Continuously improve** You increase the quality and efficiency from campaign to campaign through reusable rules.

### Integration and expansion

End-to-end data flow: You connect supplier data, internal information and reporting in one consistent process – compatible with your existing system landscape.

## What you get

A central view of status, gaps and data quality

Early risk detection instead of end-of-cycle escalations

Cleanly documented due diligence with significantly less rework

Reliable roll-ups with improving quality over time

Make responsible minerals predictable.
