iPoint Compliance

2021 | Reutlingen

The world leading Product Compliance Software

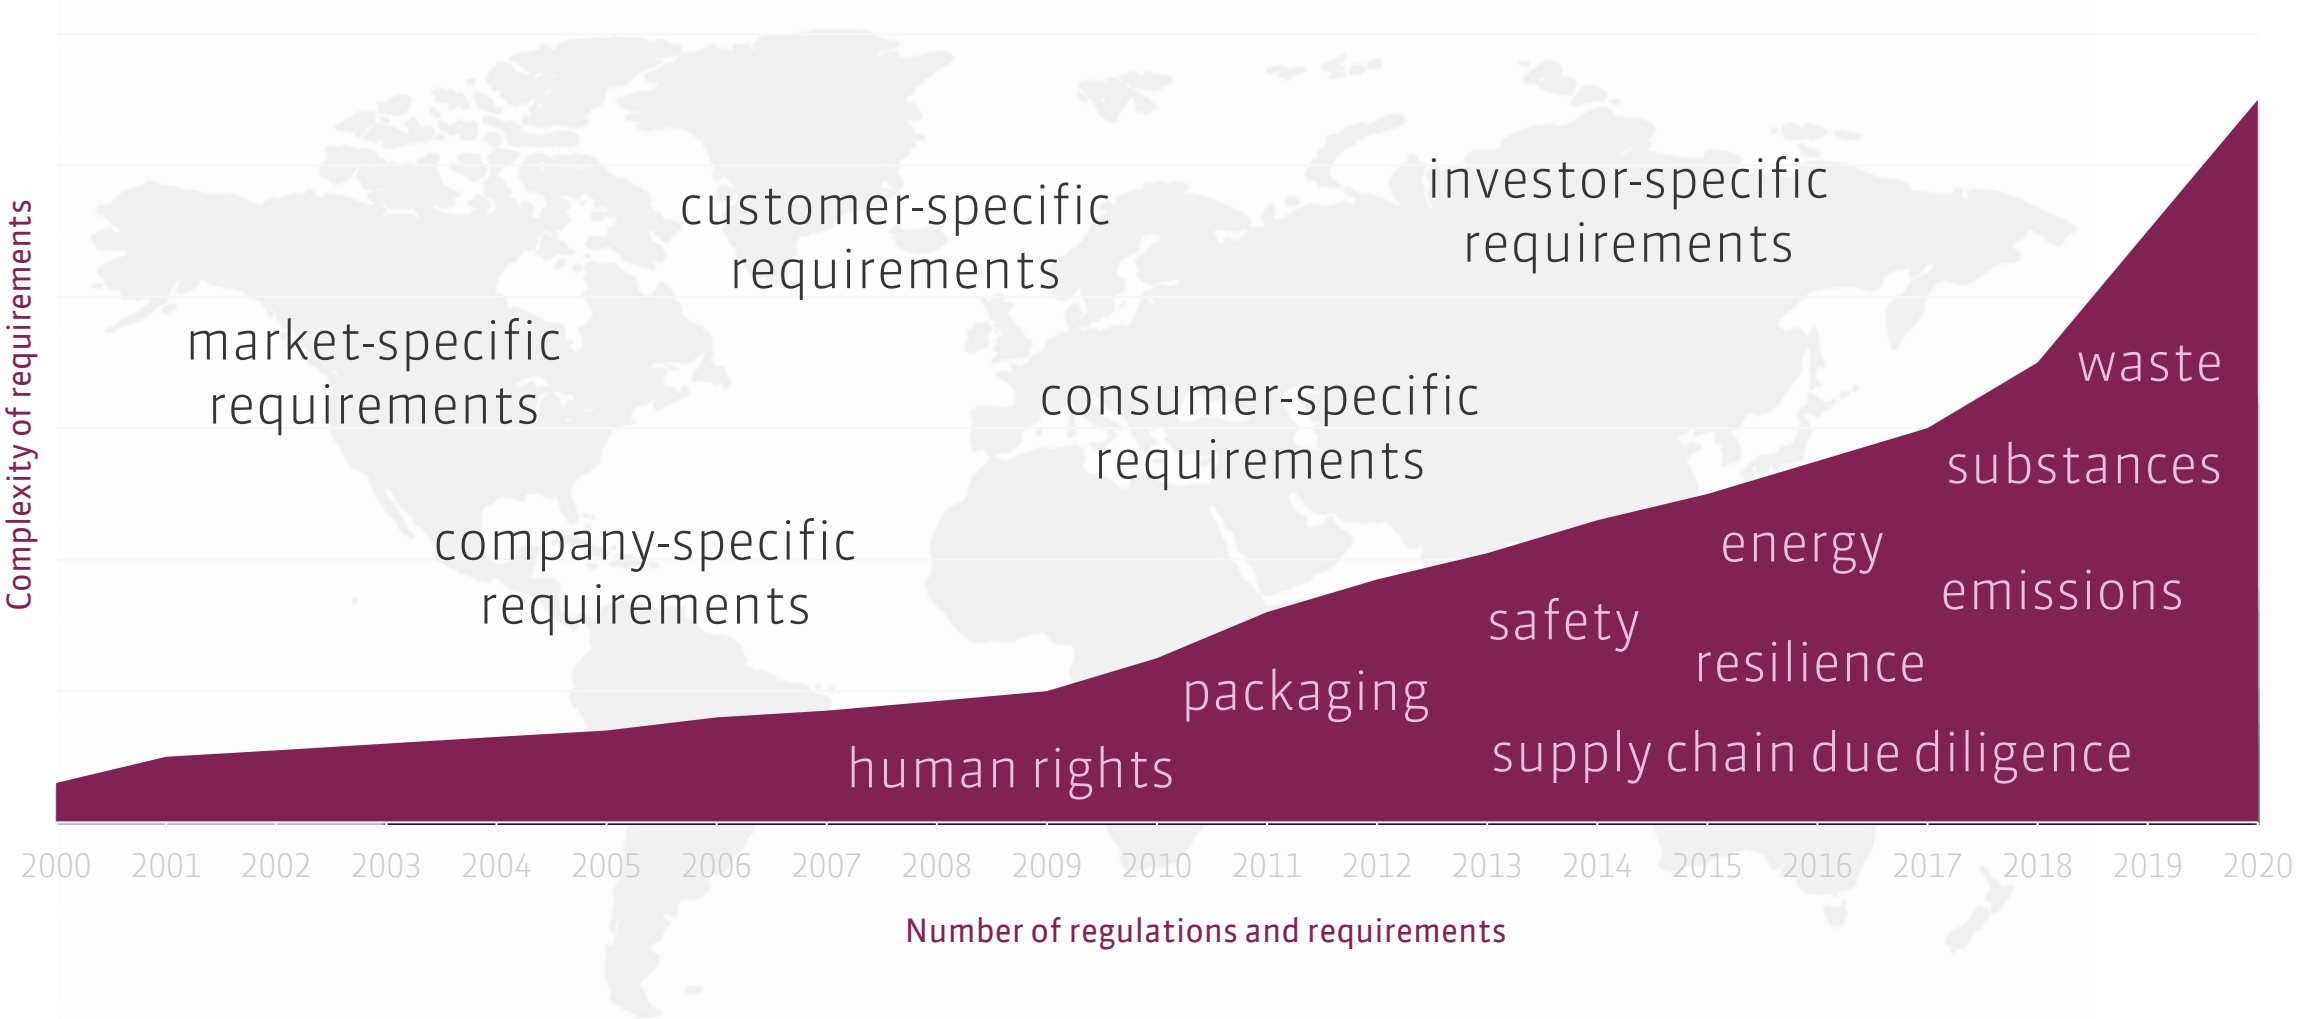

- ✓ Improve your supply chain integration and risk management
- ✓ Manage and ensure compliance of your products globally
- ✓ Market your products worldwide faster
- ✓ Make better decisions by leveraging data from multiple processes and sources
- ✓ Identify opportunities and optimize processes
- ✓ Save time and efforts by fully automating processes
- ✓ Integrate into your existing software environment
- ✓ Match your strategy with your operations

Increasing global regulations and requirements

Lead to increasing complexity

iPoint

Know your

product

- Know your product design and structure
- Manage material information
- Analyze compliance evidences

supplier

- Inquire compliance information
- Validate and verify statements from suppliers
- Visualize your supply chain's status of conformity

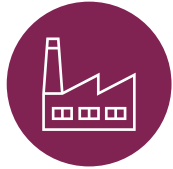

impact

- Ensure compliant products are placed on the market
- Evaluate any social impact from your suppliers

Founded on the CARE principle

Collect

Request your suppliers or organization to provide full material declarations, compliance statements, COCs or questionnaires in various industry standards

Track your requests:
Set due dates, automatically send reminders and manage escalations

Validate your received responses:
Get a validation result, accept or reject the response

Visualize the status of your inquiries

Assign validated responses to your product and material information

Analyze

Analyze the survey results

Check the up-to-date compliance status of your products

Identify substitution needs and timelines: which materials and purchased components need to be replaced due to substances restrictions?

Aggregate quotes for your products

Visualize overall status of compliance related to a certain product or to your product portfolio – standardized and customer specific web-dashboard available

Report

Create and send full material declarations using standard formats

Reuse your declarations for other industry standards and data bases

Prepare and send standard RoHS and REACH letters

Manage tasks about required reports

Track your reports about due dates, related to recipients and their acceptance status

Evolve

Improve the compliance status of your product

Enable purchasing, engineering and design engineering to make better decisions

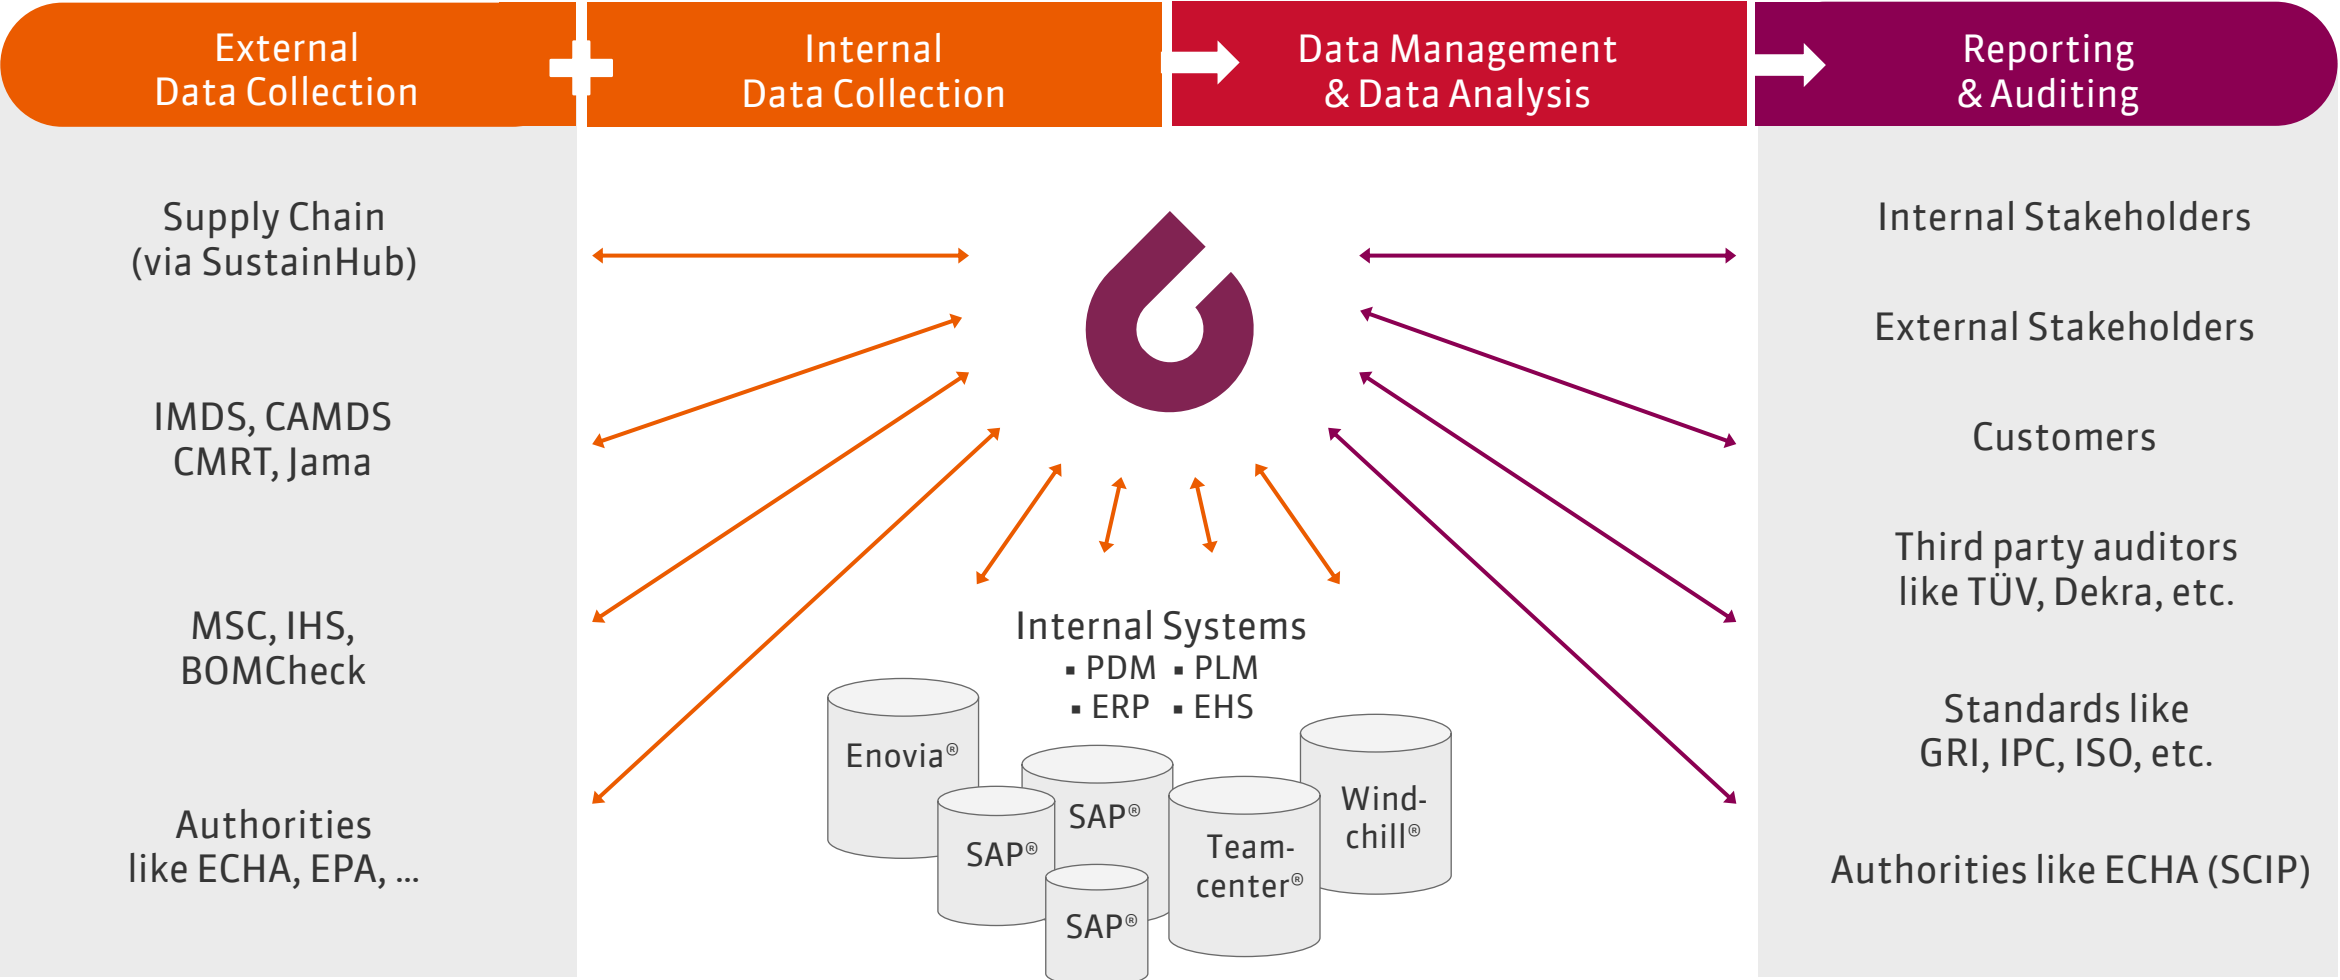

Leverage the data to make beyond compliance decisions, e.g. reduce toxicity level and identify recycle candidates

Identify opportunities to optimize processes

Integrated Solution

Compliance Cycle

With iPoint Compliance

New information request from external

- New BOM / part/ articles/ substances
- New supplier

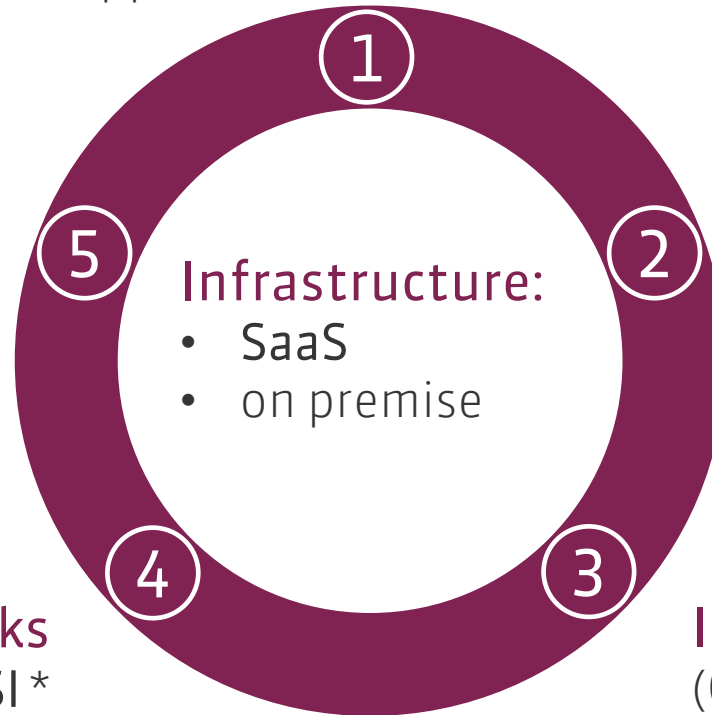

Remedies

- Rejection
- Phase out
- Substitution

Release/ Maintenance

Compliance Checks With iPoint CSI*

if not
OK

Where to get info from:

- Via internal database
- Via external database

Information Check (Completeness and quality)

if not
OK

*CSI = Compliance and Substance Inspector

Why Compliance with iPoint

-  **Qualify** your suppliers and reduce risk
-  **Generate** transparency down to substances and articles
-  **Use** one single tool for your whole supply chain and all regulations
-  **Enable** purchasing, engineering and design engineering to make better decisions
-  **Automate** your compliance operations
-  **Improve** your compliance status
-  **Ensure** compliance globally
